Healthy participants needed for a research study

Study title: Evaluation of Disparities in Sickle Cell Dental Care in Pediatric Patients

Texas Tech University Health Sciences Center researchers are doing a research study to compare **dental health in pediatric patients with and without sickle cell disease.**

This study requires participants to go to a single dental visit.

The study is led by Chibuzo O'Suoji, MD Associate Professor of Pediatrics, Hematology/Oncology Division, Texas Tech University Health Sciences Center School of Medicine, Lubbock, Texas.

Who can take part?

Healthy kids ages 5-18 are eligible
