

Accessible Charts

1. Why should I be concerned about chart accessibility? Visually impaired individuals cannot access the data labels typically used in charts to inform readers of their informational significance. Charts should therefore be titled, contain a brief alternative text description, have

with in relation to this issue.

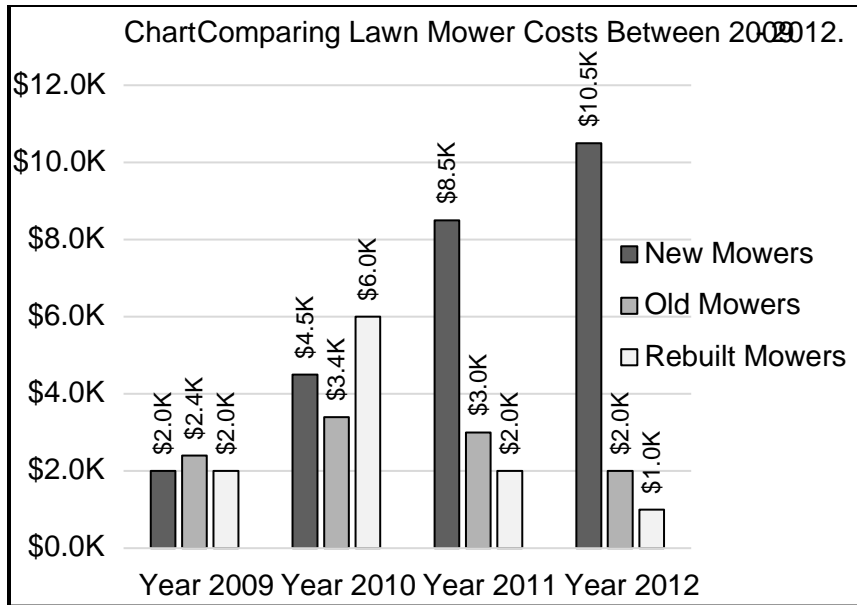

Table 1 The chart compares the average cost of mowers for the years 2009 through 2012. The average cost of new mowers quadrupled by 2012 to 10.5K, while used and rebuilt mower prices grew slowly in 2010 and 2011 and declined sharply in 2012.

Discussion of data results provided in Chart above: The chart compares...
